Product information

This ultra-inconspicuous 100% fluorocarbon hooklink material is almost invisible when submerged. The high-density Spectre Fluorocarbon lays itself on the lake bed and is suitable for a wide range of applications. Originally developed as a hooklink material with medium flexibility, it is also perfect as a camouflage leader when fishing for particularly cautious fish.

It is available in breaking strains of 15lb/6.8kg and 20lb/9.1kg. Each spool contains 20m of material.

Features:

- ultra-inconspicuous
- 100% pure fluorocarbon
- ultra-tight
