More than 10 Stk. in stock

Product information

Disperse PVA Mesh was developed for the fast and efficient use of PVA. It can be used to produce bags and sticks in the shortest possible time and with minimal waste. The super-dense micro-mesh allows it to be used with the smallest of baits, while the full dissolving formula ensures you fish with complete confidence every time. With three diameters to choose from, the Disperse PVA Mesh range is perfect for all types of baiting applications and can be used to present oily stick mixes, maggots, crushed boilies, PVA friendly particles, pellets, cat cookies, chummixers and much more - as long as the surface of your bait is dry, you can use the Disperse PVA Mesh to get it to its destination

Features:

- easy to load scoop tube
- Plunger included
- Micro-fabric PVA mesh
- Material against fraying
- No residue
- available in Wide (30mm), Boilie (25mm) and Stick (20mm) diameters
- Refill options available
