incl. 20% VAT incl. Shipping

Delivery **Thu 05. Nov - Fri 06. Nov 2026**

1 PCE in stock

The RX+ safety system is based on the RX+ light, the RX+ remote control and the RX+ sensor.
The RX+ light, remote control and sensor have been developed to be compatible with the Fox RX+ bite alarms and the RX+ radio box.

The RX+ light can be used as a regular tent light with remote control and/or connected to the bite alarms so that it lights up as soon as you get a bite. It can also be used as a floodlight to illuminate your fishing spot. With the RX+ sensor, the RX+ light can also be used as a safety lamp.

The RX+ sensor is a passive infrared motion sensor (PIR) that can be connected to the RX+ light, the RX+ wireless box and the RX+ remote control. When the RX+ detects movement, it transmits a signal to the connected device and the RX+ wireless box emits a signal or the RX+ light lights up.

Product information

The RX+ remote control can be connected to the RX+ light and the RX+ sensor to control all functions remotely
