6 Stk. in stock

Discover the SK-47 carp rod series - an absolute masterpiece in terms of performance and value for money. It has been developed to cover a wide range of carp fishing applications. This rod is a real workhorse. Whether for close combat or long casts - the blank is exceptionally powerful and at the same time close-range friendly. The classy Axial-Armored-Carbon finish and the ultra-light M Series DL black guides make it not only a functional but also a visual highlight. The SK-47 is made of high modulus carbon and scores with details such as an anti-frap tip ring, a slim handle made of Japanese shrink tube and a rod-friendly, individually shaped Sonik line clamp.

All models except the 10-foot versions have 50 mm guides. The range includes two 10-foot models that cover 3-3.5 lbs. More models can be found further down the page.

Features:

- slim design
 - high modulus carbon blank for maximum power
 - multi-dimensional carbon lay-up in the tip area for increased precision
 - 2K-Axial Armored-Carbon finish
-
