Solar SP Uni Spider Bivvy
Solar SP Uni Spider Infill Panel
Solar SP Uni Spider Zip-In groundsheet

The Uni Spider Bivvy is quite simply the best we have created for you. The SP version incorporates only the highest quality features. It is the centerpiece of our modular "Solar System" approach. This means that you can expand the Uni Spider to suit your needs - whether for a short night or a long fishing trip where maximum space, protection and comfort are required. The Uni Spider's precision-crafted stainless steel-look spreader block was created by Martin Locke. "With this bivvy you are equipped for any occasion - whatever the season, whatever the session and whatever type of angler you are. The interior is designed so that you can easily place a lounger and still sit comfortably on a chair without your head touching the ceiling." Thanks to the Quick Up frame, the Uni Spider can be set up in a flash. The innovative SolarTex D material guarantees absolute waterproofness and breathability. The blackout layer also reliably blocks out daylight. The four large, closable Mozzi mesh windows ensure an all-round view and optimum ventilation. The bivvy design efficiently drains water and an internal mesh prevents condensation. You can customize the Uni Spider with numerous accessories to suit your angling needs. "Take it anywhere"... and you will!

Features:

- Modular expansion options in the "Solar System" concept
- Quick set-up thanks to "Quick Up" spider frame
- SolarTex D material: waterproof, breathable and impermeable to light
- Four large windows for optimum visibility and ventilation
- Anti-condensation mesh inside
- Snap-Loc magnetic closures with 4 rod straps and frame buckles
- Optional: zip-in groundsheet and infill panel

Product information

- Supplied in a robust bag including pegs and storm poles
- Dimensions: 190x280x140 cm
- Weight: 10.06 kg

Solar SP zip-in groundsheet

The zip-in groundsheet for the SP Uni Spider protects against moisture and keeps unwanted little guests out. Thanks to its robust quality and reliable zippers, it is your perfect companion on the water

Features:

- Robust quality, even for demanding surfaces
- High-quality Easy-Flo zippers
- Designed for the SP UNI Spider
- Supplied in a robust bag
- Weight: 2.44 kg

Solar SP Uni Spider infill panel

The infill panel expands the Uni Spider into a fully-fledged bivvy. Thanks to the variable door and window options, you can adapt it perfectly to the conditions. The waterproof and breathable SolarTex D material ensures maximum protection

Features:

- Expansion options in the "Solar System" concept
- SolarTex D material: waterproof and breathable
- Quick installation thanks to Snap-Loc magnetic fasteners
- Wide range of door/window options
- Supplied in a robust bag
- Weight: 1.2 kg
