from 2,24 EUR / Stk.

incl. 20% VAT plus Shipping

 Delivery **Mon 02. Nov - Tue 03. Nov 2026**

6 Stk. in stock

The 9 cm ZANDER rubber was created in 2010 based on Sebastian Hänel's idea of creating a small, compact zander lure that can be cast a long way and attracts fish with its lively action. A small snack for in between, which not only lures zander but also targeted perch out of the reserve. Its material is soft yet flexible, so it lasts a long time and can withstand several attacks and drills. It has proven itself over many years and is now available in the ZANDER range.

Features:

- Low-action soft lure
 - **Bait weight: 5.9g**
 - **Package contents: 3**
 - Very soft rubber compound
 - Hand molded
 - Striking durable eye
 - Eye as contrast and attack point
 - Compact body for long casts
 - Lively run
-
