8 Stk. in stock

Diameter:	11 to 14 mm
Flavor:	spicy
Design/type:	Pop-ups

Product information

The Pro-Stim Liver Pop Ups are characterized by a number of outstanding features that make them an indispensable part of any fishing strategy. Their exceptional buoyancy provides excellent underwater visibility, making them an effective bait. These pop ups are also enriched with the potent, smoked garlic sausage flavor of the Pro-Stim Liver range, which effectively attracts fish.

In terms of size and quantity, the pop ups are offered in a uniform size of 14mm, with each tin containing 45 baits. A particularly robust skin on the bait guarantees excellent and consistent buoyancy for more than 24 hours. This feature makes the Pro-Stim Liver Pop Ups a versatile angling tool - they are ideal as a single hookbait or for balancing a 'snowman' rig.

Each of the three color variations - pink, white and yellow - has been designed to offer exceptional visual appeal to attract the attention of fish. The CCM Pop Up Mix in these lures maximizes flavor and ensures efficient leaching of the attractors. In addition, the pop ups offer an ideal texture that is perfect for coating with the matching 'Hookbait Booster'. This combination of features makes the Pro-Stim Liver Pop Ups an essential item for any angling technique.

Features:

- Extremely buoyant
- Potent flavors
- Tough skin
- Visual attraction

Directions for use:
Storage: Store in a cool, dry place away from direct sunlight.
Note: Repeated coating of the pop ups with liquids can reduce their buoyancy.

Important notice:
This product is intended solely as bait and must not be fed to fish.
