Product information

Shimano Tribal TX-4 A

Art.Nr.: 51209 / manufacturer: Shimano

from 183,99 EUR / PCE

incl. 20% VAT incl. Shipping

Delivery **Thu 05. Nov - Fri 06. Nov 2026**

10 PCE in stock

Length in feet (ft):	13 ft
Test curve (lb):	3.75 lb

Product information

The SHIMANO TRIBAL TX-4 A is a new and premium rod series from the Tribal Range, which is characterized by its quality and performance. These rods are based on advanced carbon technologies and offer impressive casting distances.
The price-performance ratio of these rods is outstanding and is unparalleled in this price category.

The TX-4A rods guarantee a combination of excellent casting and drilling performance at an affordable price.

Depending on the model and length, they offer various application possibilities:

- The longer Intensity models are powerful and allow you to reach great casting distances
- The 12ft models offer fantastic all-round performance
- The shorter 9ft Stalker and 10ft models are ideal for close and medium range fishing on smaller waters and from a boat

The TX-4A rods are built on full carbon blanks with HPC (High Pressure Carbon) and benefit from Shimano's exclusive Biofiber and Diaflash carbon technology. The tip section of the rods is optimized with T1100G High Modulus Carbon. This enables impressive casting distances of well over 200 meters. Particularly noteworthy is the rod tips' forgiveness and ability to correct, which sets them apart from other rods in this price range.

The features of the TX-4A rods include Seaguide Zirconia guides, a modern Shimano 3K carbon reel seat, a short EVA front handle and a slim handle with shrink tube and rest stopper for added safety. The design of these rods is in no way inferior to their performance.
