2 PCE in stock

Product information

Length in feet (ft):	10 ft
Test curve (lb):	3.50 lb

Experience the Orient Rods ASTRA 10` 3.5lb - a masterpiece of angling technology that conceals a surprising level of performance despite its compact size. This rod is not just an inconspicuous dot in the angling universe; it is in fact a powerful instrument designed for a wide range of uses.

The outstanding feature of the Orient Rods ASTRA 10` 3.5lb is its BUTT DRIVE CONCEPT, which gives it a more powerful butt section than the conventional top drive design. Its blank is characterized by a unique, patented design reminiscent of a fir tree shape, made from state-of-the-art Toray 40 + 46T (55-66msi) material. A sleek 1K finish gives the rod an elegant look, while the blank is additionally protected by a two-component 2K lacquer. The K-series guides in sizes 30mm to 12mm ensure optimum line guidance. The Fuji DNPSD 16 reel seat and an originally designed, fully machined and hand-polished butt cap made of aviation-certified titanium not only ensure an exclusive look, but also outstanding scratch resistance and absolute corrosion resistance. The special shape of the titanium butt cap allows the rod to be securely fastened with a shackle or by other means.

Whether for fishing from the bank, from the surface or from a boat - the Orient Rods ASTRA 10' 3.5lb is versatile and also ideally suited as a stalking rod. Thanks to its compact transport dimensions, low weight and impressive casting potential, it is a truly universal solution for anglers. The rod weighs just 242g, can handle a casting weight of up to 100g and enables casting distances of more than 150 meters.

Features:

- BUTT DRIVE CONCEPT for a powerful butt section
- Unique, patented blank design in fir tree shape
- High quality material Toray 40 + 46T (55-66msi)
- Sleek 1K finish with additional 2K lacquer protection
- K-series guide rings from 30mm to 12mm
- Fuji DNPSD 16 reel seat
