Product information

Orient Rods IVA Carp Rod 13ft 3,5lbs

Art.Nr.: 51834 / manufacturer: Orient Rods

539,99 EUR / PCE

incl. 20% VAT incl. Shipping

not in stock, available in 4-5 weeks

Product information

Length in feet (ft):	13 ft
Test curve (lb):	3.50 lb

The Orient Rods Iva 13' 3.5lb, a rod equipped with the innovative TOP DRIVE CONCEPT. This concept differs from the Butt Drive by a more powerful tip action and a softer butt section, which allows a constructive increase in power (stiffness + strength) in the tip section, while the butt section is deliberately softer. This allows effective long throws. The special structural feature of the butt section ensures maximum initial acceleration of the tip (similar to the function of a whip) and stabilizes it quickly after the throw.

The synchronized system of butt and tip section offers maximum comfort when fighting a fish. The unique, patented blank design (registered in the WIPO Global Design Database DM/090 372) in fir tree shape, together with the use of the patented 5G guide system, minimizes possible overlaps when using mono lines and thick shockleaders, in strong crosswinds and old mono lines.

Equipped with FUJI K-series SIC full stainless steel guides and a first guide of 30mm, this rod offers optimal line guidance. The blank is made of high quality Toray carbon fiber materials from Japan with 55-66 msi (40T + 46T). To further protect the blank and provide even more strength and stiffness, a special 1K carbon fiber plain finish has been applied, which also serves as a reinforcing layer.

The ORIENT-FUJI reel seat with special engraving on the carbon insert and the finishing of the handle with a carbon stocking give the rod a breathtaking appearance. The structure of its surface is not only pleasant to the touch, but also non-slip, wear-resistant, easy to clean and practical in use. The butt cap made of black anodized aerospace aluminium with a carbon insert and our logo rounds off the high-quality design.

With a weight of 350g, a casting weight range of up to 130g and a casting distance of over 200 meters, the Orient Rods Iva 13' 3.5lb sets new standards in terms of performance and design.

Features:

- TOP DRIVE CONCEPT for powerful tip action and softer butt section
- Unique, patented blank design in fir tree shape
- Patented 5G guide system minimizes overlapping
- FUJI K-Series SIC full stainless steel guide rings, first guide ring 30mm
- High quality Toray material from Japan (55-66 msi, 40T + 46T)
- Special carbon fiber plain finish 1K for extra strength
- ORIENT-FUJI reel seat with special engraving
- Handle refined with carbon stocking for non-slip, wear-resistant comfort
- Butt cap made of black anodized aerospace aluminium with carbon insert
- Weight: 350g
- Casting weight range: Up to 130g
- Casting distance: Over 200 meters
