Product information

Orient Rods VekTra

Art.Nr.: 51847 / manufacturer: Orient Rods

from 449,99 EUR / PCE

incl. 20% VAT incl. Shipping

Delivery **Mon 09. Nov - Tue 10. Nov 2026**

3 PCE in stock

Product information

Test curve (lb): 3.50 lb

The Orient Rods VekTra rod is characterized by a unique feature that is already reflected in its name. Real transformative changes have been made to the technological cycle in the production of the blank. The diameter of the blank has been reduced, while still keeping it robust enough to be considered a carp rod for long distance casting. The wall thickness of the blank was not increased, nor was the modularity of the material increased, nor were guide guides used on multiple wide supports. Instead, the most effective combination of materials and processes was used at various stages of the production process to make the blank stiffer. The way the blank works can be compared to an all-wheel drive (full drive). The load is evenly distributed in the first stage of the cast, the shank and tip are released as synchronously as possible to release the accumulated energy in the second stage of the cast. The stabilization after releasing the load is minimal for such a thin blank.

General characteristics:

- Fir tree blank design (WIPO patented)
- "FULL DRIVE" rod concept according to the classification of Orient Rods
- Blank material from Toray Japan 55-66 msi (40T+46T)
- 1K Plain reinforcing finish carbon coating was applied to add rigidity and strength
- Guide rings ALPS (S6-GSHRZG)
- Orient - Fuji reel seat with carbon bushing 1K Plain
- Orient Rods Butt Cup with brand engraving on titanium surface
- Weight of the rod: 380 grams
- Casting distance: 200+ meters

The VekTra VT-1 rod from Orient Rods combines advanced technology with traditional design to provide anglers with a rod that is designed for both long distance casting and the aesthetic pleasure of fishing.
