Product information

The SK-47 Carbon 7000 represents an innovative hybrid carp reel that combines outstanding casting performance with an extremely lightweight design. Its sophisticated exterior and the use of high-strength carbon for the body and rotor underline the high quality of this reel. The aluminium spool with its long stroke optimizes casting over long distances. Equipped with high-precision Wormshaft gearing, the reel enables perfect distribution of both monofilament and braided lines, resulting in optimum line placement with every cast. The reel also features a multi-disc micro-adjustable front drag with "Quick Torque Drag" for quick and easy adjustments when drilling large fish. A floating rotor line guard and two line clips round off the high-quality features, making this reel perfect for effortless distance casting.

Features:

- Gear ratio 4.7:1
- Quick-Torque drag system
- Wormshaft oscillation system
- Flat aluminum spool with long front section
- High-strength carbon housing and rotor construction
- Line protection system
- Finely adjustable front drag
- Strong main shaft mechanism
- Oversized line guard
- Conical crank handle holder
- Torsion-free line roller
- Ambidextrous, aluminum handle with T-shaped grip
- Capacity 0.32/430 0.35/360 0.38/300
- Weight 454g
