The Nytro Floating Hooked Needle is specially designed to easily pull through hair rigs or pellet bands. It is ideal for a variety of baits including soft pellets, corn, soft hookbaits and even live bait such as worms. Thanks to the sturdy handle, which sits comfortably in the hand, and the buoyant material from which it is made, this needle remains detectable even if it accidentally falls into the water.

Features:

- With a floating handle that prevents it from sinking
- Perfect for rigging soft hookbaits, pellets and worms on hair and bait lines
- Equipped with a 1mm thick stainless steel needle for durability and reliability
- Packaged in a more environmentally friendly way with less plastic
