from 0,69 EUR / PCE

incl. 20% VAT plus Shipping

Delivery **Thu 05. Nov - Fri 06. Nov 2026**

More than 10 PCE in stock

This traditional hook remover allows the line to run through a recess and be guided directly to the hook. The hook can be safely removed with gentle pressure. For anglers who prefer to have their equipment to hand at all times, there is a hole at the top end of the disgorger through which a lanyard can be pulled.

Product information

It is made of robust plastic and has a strong cross-section.

The Guru **Fine Disgorger** is specially designed for use with smaller, finer hooks to safely remove them from the fish's mouth, the **Medium Disgorger** is specially designed for use with larger, thicker hooks and the **Double Disgorger** is versatile and designed for both hook types: on the narrow side for small, fine wire hooks and on the thicker side for larger, thicker wire hooks.
