More than 10 Stk. in stock

Product information

Diameter:	15 to 16 mm
Design/type:	Pop-ups

Are you looking for a hook bait that carp can't resist? Our new **Watercraft Bait Smoke Pop-Ups 16mm V2** are just what you need! The latest development of our legendary Smoke Pop-Ups feature an **innovative Baitsmoke coating** that is perfectly matched to each variety and has now been enriched with our ingenious **DNA feeding stimulator!**

As soon as the bait comes into contact with water, the **Baitsmoke coating** is activated immediately. The color spreads in the water while feeding signals are emitted. The **effectiveness of the pop-ups** has now been further enhanced by the use of our proven **DNA feeding stimulator**. This additional component has been proven to make the bait irresistible to carp. During the test phase, there were several occasions when nothing had been caught in the entire lake for days, and then suddenly several fish were caught in quick succession with the Smoke Popis! :)

Whether you want to use them together with boilies as a "snowman," in combination with other feed, or simply as a solo hookbait, our Baitsmoke Pop-Ups V2 are extremely versatile.

Handmade in Austria!
Contents per package: approx. 60g
