Art.Nr.: 51117 / manufacturer: Watercraft Baits & Tackle

from 14,99 EUR / PCE

incl. 20% VAT plus Shipping

Delivery **Fri 06. Nov - Mon 09. Nov 2026**

More than 10 PCE in stock

This perfect fluorocarbon leader material is ideal for many rigs - spinner rigs, hinged stiff rigs and combination rigs can be optimally made with it. The material is inconspicuous and transparent, making it completely invisible to the fish. Another major advantage is that it can be crimped.
The material can also be shaped using steam. For example, to make a Whity Pool Rig. If you rub it between your fingers until it gets warm, you can stretch it perfectly straight.

This material is stiff and ensures that your rig is stretched away from the lead system and therefore always lies straight on the spot. Three different strengths are available to cover all fishing situations. This material is supplied on 30m spools.
The spools deliberately have a large diameter so that the material is not preformed with a small radius and is easier to work with.

Properties:

- Stiff and abrasion-resistant

Product information

- Absolutely invisible in the water
- Does not tangle when casting
- Very easy to work with as the material is not bent too much
- Suitable for many different rigs
- Can be crimped
