Product information

The Quappie is an innovative rubber lure from Sebastian Hänel's think tank and represents a significant innovation in the world of fishing lures.

The Quappie is predestined for jigging, but can also be successfully presented with other techniques such as trolling or casting. It is particularly effective in heavily fished waters, where traditional lures often lose their effectiveness.
With the 15cm quappie, you have an innovative and versatile lure at hand that impresses with its natural movements and targeted construction and successfully hooks both zander and pike.

Features:

- High-frequency fluttering pectoral fins
- Low-action wedgetail
- Easy to suck in
- Eye-catching durable eye
- Soft, yet robust rubber compound
- No toxic plasticizers: free from BPA and phthalates
- Lure length: 15cm, ideal for fishing for zander and pike
- Recommended jig head: size #4/0 for optimal presentation and hook setting
