 Delivery **Mon 19. Oct - Tue 20. Oct 2026**

1 Stk. in stock

Diameter: 0.15-0.19 mm

Line type: Braided

Product information

The Nash Highline - Your ultimate main line

Looking for a mainline that offers extended casting distance and accuracy because you know that these factors determine your fishing success? Then Highline is the perfect choice for you. This braided line with 8 strands and an extremely small diameter not only enables smooth casting, but also performs excellently on and off the reel.

Highline floats, which means you can easily fish over weedbeds and submerged obstacles. Even when your rigs are hundreds of meters away, Highline ensures an effective display. And don't worry, the low visibility thanks to the green color ensures optimal camouflage.

With a wide range of diameters to choose from, you can use Highline with or without a lay line to suit your needs. And thanks to the large 600m and 1200m spools, you can optimize reel capacity for any situation.

Features:

- 8 strands
 - Small diameter
 - Round profile for smooth casting
 - Floating for fishing over obstacles
 - Green color for camouflage
 - Wide range of diameters
 - Large spools for optimized reel capacity
-
