1 PCE in stock

The SP C-TECH SINGLE ROD SLEEVE offers secure transportation and protection for single rods. Specially tailored for 50mm launch rings and with a molded reel section that effortlessly accommodates large pit reels. Solar's high quality two-way zippers seal your rods securely, while the anti-snag lining ensures you only hook what you want.

As part of the Solar Modular Concept, the sleeves are designed to fit into our SP C-Tech Rod Holdalls via pockets and robust, fail-safe clips. Additional rod sleeves can be attached to the clips if required, and the sleeves can also be used individually from the AirStrap. The stylish SolarCam camouflage pattern completes the design perfectly.

Features:

- Made from G-Tex, Solar's recycled high-performance fabric
- Solar System Modular concept
- Self-venting AirStrap attachment hooks (for multiple connection of sleeves to one strap)
- Zipper from the top for easy insertion of rod and reel

Product information

- Anti-snag inner lining

Our sport depends on a healthy environment. That's why the SP C-Tech range is made from sustainable G-Tex fabric, made from recycled plastics and certified to the 'Global Recycled Standard' and 'Green Product Mark'. It's time to take responsibility.
