from 13,99 EUR / PCE

incl. 20% VAT plus Shipping

 Delivery **Mon 19. Oct - Tue 20. Oct 2026**

More than 10 PCE in stock

Ultraflexible is an extremely supple, meticulously round leader material that sinks and adapts perfectly to the bottom. This very easy to knot (great knot strength), braided material gives your bait a natural behavior and will also hook very cautious carp. It is suitable for any type of hook and is perfect for continuous or combination rigs.

Product information

The hook turns perfectly at any angle and drops down immediately! This allows you to significantly increase your bite frequency!

The base material is produced with a heavier, abrasion-resistant braid that sinks well. If you want to increase the sinking properties, you can simply pull the rig through a kneading block. Then it literally sticks to the bottom! :)

Properties:

- Ultra soft and inconspicuous
 - Hardly noticeable to the fish
 - Sinks and adapts to the bottom of the water
 - Enormous load capacity and safety
 - Made in Germany!
