Product information

The Two Tone Element jogging pants combine exceptional style with first-class functionality and set new standards in fishing clothing with their vertical color gradient from dark at the waistband to light at the ankles. This unique design perfectly complements the Two Tone Element Hoody and creates a harmonious, modern look.

The laminated, windproof inner membrane and pixel fleece lining guarantee the outstanding thermal insulation normally expected from outer layers. Thanks to the camouflage trims on the knees and seat, the pants effectively protect against moisture in areas that frequently come into contact with damp surfaces.

Features:

- 320 g/m² heavy outer fabric for durability and warmth
- 200 g/m² windproof inner membrane with pixel fleece lining
- Camouflage reinforcements on the knees and seat to protect against moisture
- Embossed Element logo on the thighs as a design highlight
- Fleece-lined hand warmer pockets with zipper
- Ribbed waistband with elasticated ankle cuffs for a perfect fit
