- 1 liter Big Boost Bottle

Scandic Salmon Oil, Salmon Oil has Omega 3 and Omega 6 fatty acids and a very high general fat content. The carp absolutely needs fats in its food. Salmon oil in particular has an enormous attraction for fish because they instinctively need

Product information

these nutrients. Perfect as an ingredient for Boilies, for pouring over food or for dipping hookbaits. Our liquids are PVA friendly.

Robin Red, to give your food that certain spice kick is definitely an excellent idea. Use the Watercraft Original Robin Red. A thousand times proven flavor carrier that carp love. Of course, the liquid is also recommended for the production of Boilies.

Liquid Chicken Liver, Boost Liquid Liver is a liquid chicken liver extract.

This is one of the substances described by Howard E. Loeb, a biologist from the USA, as an excellent carp attractant. In our opinion, the man is absolutely right! Especially in fishmeal recipes, liquid liver has been a mega attractor for years. It has vitamin B12 and is full of free amino acids. This is pure chicken liver (pureed chicken liver). This is why the liquid has a light brownish color and a fresh, intense liver aroma.

Hemp Oil Hemp Oil, This liquid oil is obtained from hemp seed and is probably one of the most successful fishing lures. Booster Hemp Oil has an excellent nutritional profile with high-quality fatty acids, vitamins and minerals. Carp love hemp and utilize the high-quality fats ideally, and you can make a perfect oily attractant column with the liquid. Great if you wet 8mm birdy hemp pellets with it, for example. Feed these with the rocket and fish with a "Zig-Montage" in the middle water layers. Hemp oil does the trick.

Bloodworm, also known as red midge larvae, is one of the main food sources for carp in almost most waters. The attraction is enormous due to the value of the food and the familiar food source. Certainly one of the best natural boost liquids!

Big Fish Boost Liquid is a high quality liquid fish protein that carp respond to immediately. Fish protein is highly soluble in water and full of the best amino acids.

Almost unbeatable in attractiveness! In our opinion, liquids belong in every bait box, whether for soaking Boilies, pellets and particles, or for making stick or method mixes. The range of applications is practically unlimited. Our liquids are PVA friendly and therefore also ideal for use with PVA mesh and bags.

It is a very good idea to mix the liquid into the feed a few hours before fishing. Our liquids will increase your catch yield considerably.
