The Uni Spider Bivvy is the best Solar Tackle could build for you. The SP designation shows you that it is the best available.

Product information

The Uni Spider Bivvy is the centerpiece of the modular "Solar System" concept. This means that the Uni Spider can be adapted to your fishing needs, whether fast, agile trips or longer sessions with optimal space, protection and comfort!

Designed with a precision engineered Solar DNA spreader block, developed by Martins Locke, this 'go-anywhere' bivvy is adaptable to any season, any session and any angler. It optimizes the interior space so you can fit a lounger in the back and still have room to sit dry and protected on a chair in the front. It also offers sufficient headroom so that you don't feel cramped.

The Uni Spider is based on the 'Quick Up' chassis for super-fast set-up with maximum stability. It is made from the incredible SolarTex D fabric, which offers excellent protection against water, is breathable and completely prevents light from penetrating.

Features:

- modular "Solar System" concept
- reliable
- "Quick Up" spider frame for super-fast assembly
- SolarTex D material, fully waterproof and breathable with darkening inner coating
- Optimum space thanks to square footprint
- Four zippered roll-up and mesh windows for ultimate visibility and air circulation
- Double-skin ceiling membrane to prevent condensation
- Snap-Loc complete system, magnetic fixings including 4 pole ties and window buckles
- Solar DNA spreader block
- Separately available single-zip groundsheet and front infill panel
- Includes hard-wearing carry bag with zipper
- Storm poles with electric drive included

Dimensions:

- **190cm x 280cm x 140cm**
- Weight: 10.06 kg
