Product information

The Uni Spider is without doubt the most outstanding bivvy we have developed for you. With the South Westerly Pro we guarantee you a first class introduction to the latest bivvy trends in carp fishing at an affordable price. For all mobile anglers, the South Westerly Pro Uni Spider is also amazingly lightweight.

The Uni Spider bivvy is at the heart of our 'Solar System' range. This means you can customize the Uni Spider to your exact fishing preferences, whether for quick deployments or extended sessions with maximum space, protection and convenience - it's exactly what you've been looking for.

Designed by Martins Locke, the Uni Spider's specially designed nylon spreader block ensures that this bivvy suits any season and any type of angler. It offers enough space to place a lounger in the back while relaxing on a chair in the front, all dry and safe. Its design also offers plenty of headroom so you won't feel cramped.

At the heart of the Uni Spider is our 'Quick-Up' system, which enables lightning-fast assembly and maximum stability. Made from our SolarTex 3 material, it guarantees maximum waterproofness. The four large windows with mosquito nets offer a great view and provide pleasant ventilation.

The aerodynamic shape of the Uni ensures efficient water drainage, while the internal vapor protection virtually eliminates condensation.

There are also numerous accessories to adapt the Uni Spider perfectly to your fishing routine.

Features:

- The centerpiece of our "Solar System" series: The UNI Spider grows with your fishing adventure.
- Lightning-fast "Quick Up" Spider frame system.
- High-quality SolarTex 3 material.
