Delivery **Thu 05. Nov - Fri 06. Nov 2026**

More than 10 PCE in stock

Flavor: fruity/sweet

4kg Boilies incl. matching wafter!

Product information

With this **new special edition**, we are launching a **highly effective concept** that targets large carp. The **deliciously vanilla** Boilies combine finely balanced ingredients with our **brutally catchy DNA food stimulator**.

A hint of **NHDC Sweetner** provides the subtle sweetness, while **sweet paprika** gives the mix an extra depth of flavor. Supplemented with **N-Butyric**, this bait develops an irresistible attraction. It also offers competition anglers a strong alternative to classic Boilies, where this mix stands out strongly. Due to the fast intestinal transit time, the carp continue to eat and remain at the spot.

To make the aroma even more intense, we ferment the mix before rolling. An increased proportion of milk proteins makes the Boilies creamy and smooth. High-quality ingredients such as **bisquit, bird food, corn flour, brewer's yeast and butyric acid** make it a real carp magnet.

Taste: Comparable to a sweet, fermented cookie - irresistible for carp
Range of use: Perfect for all waters and as a competition boilie
Dissolving time: Boilie washes out completely, shelf life approx. 24h at 20°C water temperature
