More than 10 PCE in stock

Flavor: fishy

4kg Boilies incl. matching wafter!

Product information

With this **new special edition**, we are launching a **highly effective concept** that is specifically designed for large carp. This **high-protein Boilie** combines the best ingredients from the sea with a perfectly balanced seasoning mix (with our Robin Spice).

The base is a relatively fatty **halibut fish mix** that provides the carp with a perfect food source, refined with **squid meal** for that extra kick and attraction. A **subtle hint of Chayenne pepper** provides the special mix taste, while **Curcuma Robin Spice** refines the aroma and stimulates digestion. Supplemented with our **brutally catchy DNA food stimulator**, this bait also has an unbeatable attracting effect.

Its **complex composition** makes it a real **food source for carp**. Thanks to the high-quality mixture of fish meal and spices, it is quickly perceived as an attractive food offer in the water and is immediately accepted. In numerous tests, this Boilie led to massive feeding frenzies.

You can expect big surprises all year round - from spring to late fall.

Taste: Spicy high-protein Boilie with an intense fish and spice flavor
Area of application: Also ideal for feeding campaigns and targeted fishing for large carp
Effect: Strong attracting effect thanks to perfectly balanced ingredients and DNA food stimulator
