The **Amorce attractant** is a high-quality attractant that has been specially developed to effectively attract fish and keep them at the feeding site for a long time.
The fine mixture ensures a quick attracting effect and can be used pure or refined with additional ingredients such as

Product information

particles, flours or liquids.

Thanks to the balanced composition, the groundbait is suitable for different types of water and can be combined with different feeding strategies.

Properties:

- Fine bait with strong attraction
- Versatile use in still and flowing waters
- Can be supplemented with particles, flours, liquids or flavors
- Ensures a long-lasting feeding effect
- Easy to mix and use
