Birdy Vanilla - sweet all-round flour for Boilies, groundbait and stickmix

Birdy Vanilla is a versatile groundbait flour with an intensely sweet vanilla flavor. It is ideal for making Boilies, stick mixes and groundbait. Thanks to its attractive aroma and taste, it is not only well accepted by carp, but also by whitefish and

Product information

tench.

Vanilla acts as a natural flavor and odor enhancer in the feed mix. This is why we also use Birdy Vanilla specifically in our successful Big Vanilla PN-B Boilie.

With a proportion of up to 20% in the mix, the flour improves the binding and firmness of the feed mix - particularly beneficial when fishing in rivers with strong currents.

In groundbait, Birdy Vanilla not only provides reliable stickiness, but also an attractive cloud of food that quickly draws the fish's attention to the spot. In boilie mixes, it provides valuable carbohydrates and gives the bait a naturally sweet taste with a high attracting effect.

Properties:

- All-round flour with an intense vanilla flavor
- Ideal for Boilies, groundbait and stick mixes
- Acts as a natural binder and improves the structure
- Creates an attractive cloud of food in the water
- Provides carbohydrates and promotes energy absorption
- Can be used up to 20% in the mix
