1 Stk. in stock

The CRESTA Snyper River Feeder rods are designed for demanding river fishing. They offer you the power you need to cast heavy feeders reliably and accurately. Depending on the current and bait weight, you can choose between different casting weights to react flexibly to any situation on the water. The division of the rod - including the tip - into segments of equal

# Product information

length makes it easier for you to transport the rod safely, even when it is set up. The handle is made from a combination of high-quality cork and EVA foam for a comfortable grip. Each rod is supplied with several interchangeable tips, which are equipped with a sturdy double-legged tip ring.

**Features:**

- Powerful action for fishing with heavy baskets
- Ideal for strong currents and long casts
- Various casting weights for flexible application options
- Even division for easy transportation of assembled rods
- High-quality cork EVA handle for a secure grip
- Includes several interchangeable tips
- Tips with double-legged tip ring for extra stability
