1 PCE in stock

The Make It Happen Flexi Wrap from Nash is an extremely durable polarized goggle with a flexible frame and is impact resistant and virtually unbreakable. Vented elements prevent the lenses from fogging, while wide temples shield light from the sides to maximize polarization performance.

The lenses are available in either **amber** for mixed light conditions or **smoky gray** for particularly bright conditions. Thanks to a special coating, reflections on the water surface are significantly reduced, which significantly improves the depth of vision - particularly helpful in difficult light conditions or when actively searching for fish. A safety strap is included to ensure that the goggles are not lost if they fall into the water.

Features:

- Impact-resistant and flexible frame construction
- Ventilated frame prevents fogging
- Wide temples for improved light shielding

Product information

- Polarized lenses available in amber or smoke grey
- Special anti-reflective coating for maximum depth of vision
- Floatable safety strap included
