1 PCE in stock

The RPS backlead offers a reliable way of lowering the line safely. It is equipped with a winding board and a 10-meter fluorescent cord. The safety bolt with magnetic catch enables controlled lowering into the water.

Product information

The hardness of the release mechanism can be adjusted in four stages to ensure adaptation to different conditions. Thanks to the integrated buoyancy chamber, the height in the water can be individually adjusted.

The backlead is available in two weight classes (80g and 100g) and is compatible with the backlead hold system.

Features:

- Safety pin with magnetic catch for controlled lowering
- Degree of hardness of the release mechanism adjustable in four stages
- Buoyancy body for height regulation in the water
- With winding board and 10m fluorescent cord
- Available in 80g and 100g
- Compatible with the backlead hold system
