Product information

The Extraslick Marker Braid is an absolute premium product when it comes to marking a wide fishing spot. The line is extra smooth, durable, and stretches immediately even with extreme casts.
It offers maximum strength and is slim and stretch-free thanks to its round, precise braiding. An absolute high-end marker line – made in Japan

One outstanding feature that sets our line apart from other lines is its specially smooth coating. The special coating gives this marker braid a unique softness, which provides an extremely smooth surface and thus enables above-average casting distances.

Features:

- Extra smooth coating
- Stretches quickly, preventing tangles
- Round, precise braiding
- Guarantees longer casts
