More than 10 PCE in stock

The Watercraft Pink Squid Pellets impress with their eye-catching appearance, quick solubility and highly attractive composition of squid meal, bird food and water-soluble ingredients. They can be used all year round and reliably attract fish even in cold water temperatures. After a short time in the water, the pellets release a colored cloud and fine particles - a

Product information

real attraction!

The pink coloring creates a visual stimulus that can make all the difference, especially in heavily fished waters. They are particularly effective in Spombs, feeding buckets or when used with zig rigs. In combination with a suitable booster or soak, the attracting effect can be further enhanced. They also cut an excellent figure as an addition to Boilies, particles or groundbait.

Properties:

- Striking pink coloration with a strong visual attraction effect
 - Contains squid meal and bird food for high attractiveness
 - Quickly forms a colored cloud with fine particles in the water
 - Can be used all year round - dissolves well even in cold water
 - Ideal for Spombs, zig rigs, stick mix and feeding campaigns
 - Can be perfectly combined with boosters, soaks, Boilies or particles
 - Available in various pellet sizes for versatile applications
-
