from 2,50 EUR / PCE

incl. 20% VAT plus Shipping

Delivery **Thu 05. Nov - Fri 06. Nov 2026**

3 PCE in stock

The Skeater Nano Drifter Floats are made of high-density, virtually indestructible material and developed for tough predator fishing. They offer reliable stability, optimum visibility and high durability.

The eye-catching red tip with contrasting white band and black body ensures that every bite remains clearly visible - even at great distances or in difficult lighting conditions. The striking dart wing design also acts as a sail and allows the float to drift slowly in the wind, so that you can effectively scan large areas of water.

Features:

- Robust construction made from high-density material
- Dart wing ensures wind drift and improved visibility
- Red tip with white band and black base for clear bite detection
- Suitable for swivel mounting
- Available in 15g, 25g, 35g and 50g
