8 PCE in stock

Skeater Twin Crimps are designed for anglers who value a clean, professional and durable crimp connection. They fit perfectly with Skeater Crimping Pliers as well as Skeater fluorocarbon and wire leaders.

Product information

When crimping, a slightly flared angle is created which prevents the leader material from rubbing against sharp edges. This increases durability and ensures a smooth loop guide. For a particularly neat finish, the crimps can be optimally combined with Skeater Shrink Tube. Supplied in practical packs of 20 and available in two sizes.

Features:

- Precision manufactured for stable and professional rig connections
- Flared-angle design protects the leader material from sharp edges
- Suitable for Skeater crimping pliers, fluorocarbon and wire leaders
- Can be combined with Skeater Shrink Tube for a clean finish
- Two sizes: 0.8x1.7x8mm and 1x2.2x8mm
- Packaging unit: 20 pieces per pack
