The **Smart Fish Deep See Pro7** has been completely redesigned and upgraded to a significantly higher technical standard. The system combines a high-resolution underwater camera with an extremely bright 1000-nit display that remains easy to read even in strong sunlight.

Product information

With 2 million pixels, the camera module delivers a clear 1080p image and displays underwater scenes cleanly, sharply, and with a wide field of view.

The built-in 5000mAh battery ensures long runtime (5–8 hours of continuous operation = up to 14 days while fishing or during normal use), so you can use the camera for many days without having to recharge it.
Newly integrated features include photo and video recording , an accurate water temperature display, and a depth gauge. The menu is simplified and straightforward, making operation quick and intuitive.

The device has been made more compact and offers a lighter weight while delivering higher performance. Three 1/4-inch quick-release mounts allow for flexible mounting on poles, brackets, or accessory systems. The tempered display glass protects against scratches and maintains a clear display. A hard case is included for transport, providing reliable protection for the camera.

As an authorized dealer, we offer a 2-year warranty. The camera is splash-proof.
For safe storage, we recommend using silica gel packets in the carrying case to absorb residual moisture from the connectors. The camera must always be stored in a dry place!

Features:

- 1000-nit display for clear visibility in sunlight
- 7-inch = 177.8 mm screen diagonal
- 1080p camera with 2 million pixels
- 5000mAh battery with long runtime
- Built-in photo and video recording
- Displays water temperature and depth
- Compact, lightweight design
- Tempered display glass
- Simplified user menu
- 170° wide-angle view without distortion
- Cable length: 30 m
- Two 1/4-inch quick-release mounts
- Hard case included for safe transport
- 2-year warranty from the retailer
- Recommendation: Use silica gel packets in the bag to absorb moisture
