Sonik Turbospod

Art.Nr.: 59571 / manufacturer: Sonik

from 119,99 EUR / Stk.

incl. 20% VAT plus Shipping

Delivery **Thu 05. Nov - Fri 06. Nov 2026**

8 Stk. in stock

Product information

Test curve (lb): 4.00 lb and more

Sonik Turbospod Carp Rods are specially designed for spodding at maximum distance and with high precision. The blank is made of high-modulus low-resin carbon and is reinforced by a matte armored carbon helix construction. This creates an extremely powerful backbone that is combined with a progressive tip action. The result is high casting performance with controlled feedback.

The BulletPoint™ multidirectional tip construction ensures very fast recovery and clean trajectories. This is supported by 50mm K-Style Seaguide TCG guides with zirconia ceramic inserts and a 16mm Seaguide XUT anti-frap tip ring with a seamlessly welded frame. This combination increases casting accuracy and significantly reduces tangles.

A matte black Seaguide XSS-18 reel seat with twin-lock locknuts and 1K carbon insert securely holds the reel in place, even with heavy spod setups. The extended, shortened handle section provides more leverage when casting. An ergonomically shaped shrink rubber end grip ensures a secure hold. The rod is rounded off by depth markings and a stand-off stainless steel end cap, which improves balance and protection.

Features:

- Highly modular low-resin carbon blank
- Matt armored carbon helix construction
- Extremely powerful handle with progressive tip action
- BulletPoint™ multidirectional tip layup for fast recovery
- 50mm K-Style Seaguide TCG guides with zirconia inserts
- 16 mm Seaguide XUT anti-frap tip ring with slimline zirconia
- Seaguide XSS-18 reel seat with Twin-Lock and 1K carbon insert
- Depth markings on the blank
- Extended, shortened handle for greater leverage
- Ergonomic shrink rubber end grip
- Stand-off stainless steel end cap for better balance point
