 Delivery **Mon 19. Oct - Tue 20. Oct 2026**

More than 10 Stk. in stock

Product information

Sonik Xtractor Custom Carp Rods combine modern technology with high-quality workmanship for maximum performance when carp fishing. The super-high-modulus low resin carbon blank, combined with the matt armored carbon Helix construction, ensures powerful casts and a reactive action.

The BulletPoint™ tip guarantees fast recovery and precise casting, while the American Tackle Ti-Forged Air Guides in a 50mm arrangement (on 9ft and 10ft models) and the 16mm Delta Black Anti-Frapp tip with NanoLite™ ceramic insert ensure smooth line running.

The VARI-TAPER™ connection system delivers a smooth, progressive action across the entire length of the rod. The CNC-1K Carbon DPS-18 reel seat with matte black hoods (size 16 on 6ft models) allows for secure and precise attachment of the reel. The rod is rounded off by the slim Deception Camo EVA handle, a laser-engraved butt cap, and two included Tadpole rod ties.

Features:

- Super-high-modulus low resin carbon blank
 - BulletPoint™ tip for fast recovery and precise casting
