8 PCE in stock

STANZ Bankstick Stabilizers provide additional stability for individual banksticks and prevent them from twisting or sinking into soft ground. Made from high-quality, lightweight aluminum, they combine durability with light weight. An integrated captive thumb screw ensures a secure hold and easy attachment to the bankstick.

Features:

- Additional stability for individual banksticks
- Reduces twisting and sinking into soft ground
- Durable, lightweight aluminum for long-lasting use
- Solid tip and precise fit for optimal stability
- Integrated captive thumb screw for a secure hold
- HC0073 compatible with 16mm banksticks
- HC0074 compatible with 19mm banksticks
