Product information

Orient Rods Venus V3 13ft 3-5oz ALPS Ti

Art.Nr.: 59876 / manufacturer: Orient Rods

539,99 EUR / PCE

incl. 20% VAT incl. Shipping

not in stock, available in 4-5 weeks

Product information

Length in feet (ft):	13 ft
Test curve (lb):	3.50 lb

The Orient Rods Venus V-3 13' 3-5oz. is an enhanced version of the V2 that can truly be described as a casting rod designed for handling heavy loads under demanding conditions (headwinds, casting large PVA sticks, and heavy loads). Its efficiency in terms of performance per unit of effort is 20% higher than that of other models.

This performance boost was achieved by adding cross-prepreg to the longitudinal fibers at a specific angle, which provided additional stiffness and strength similar to that of a multi-layered reinforced blank. A finish coating with a higher elastic modulus of the fibers is also used. Thanks to these changes, it became possible to reduce the blank diameter, making the rod more elegant without losing strength.

A new design feature is the titanium and carbon butt cap, developed by our company, which is a real highlight of the rod. As with our flagship Iva rod, the handle is manufactured using a carbon sleeve. The lightweight ALPS series guides installed on the rod have only a minimal impact on the structure and flex of the blank.

Five guides (5G) could be used on this blank.

Features:

- Christmas tree blank design (WIPO patented)
- Butt Drive Rod System – Orient Rods Classifier
- Blank material: Toray Japan 55-66 msi (40T+46T)
- Reinforcing 1K Plain carbon finish coating for additional strength and stiffness
- ALPS series guide rings (S6-GSHRZG)
- Reel seat: Fuji Japan
- Combined Orient Butt Cup, Material: Titanium-Carbon
- Rod weight: 405 grams
- Casting distance: 200+ meters

The Orient Rods Venus V-3 combines innovation and traditional rod-building craftsmanship to offer anglers a rod for demanding conditions and heavy loads without compromising on aesthetics and handling.
