Product information

The Fox Voyager Bed Series offers first-class sleeping comfort, well-thought-out functionality, and robust construction to the highest standards. Designed for discerning anglers who don’t want to compromise on a restful night’s sleep, even when they’re out on the water.

The completely flat lying surface ensures maximum comfort, while the continuous back support system guarantees a firm mattress without any annoying sagging. The design without adjustment screws further maximizes the usable lying area.

The padded mattress with a fleece cover and the extra-padded headrest offer outstanding comfort—ideal for longer sessions. Thanks to the double-hinge joints, the bed can even be folded up with a sleeping bag inside. Side compression straps ensure a particularly compact pack size.

Large ball-joint mud feet and 6 length-adjustable legs ensure a stable footing on virtually any surface.
