More than 10 PCE in stock

The NYTRO NTO-B3 Barbless Method Latex Bait Band Hooks to Nylon from the B3 series are designed for use with large, powerful fish where maximum stability and secure hooking are crucial. With a leader length of 10 cm, they offer a compact and durable setup for method feeder fishing.

Equipped with a durable latex bait band, these rigs are ideal for presenting wafers or hard pellets directly at the feeder. They are tied using high-quality Sublime Power Rig Mono and the strong, barbless NTO-B3 Specimen hook. This heavy-gauge hook with an inward-curved eye ensures high holding power and reliability when targeting large fish.

Features:

- Pre-tied with NTO-B3 Specimen Strong hooks
- Barbless
- Heavy-gauge wire with inward-curved eye
- Hook leader length: 10 cm / 4”
- Integrated latex bait band
