Product information

Nash Air Force F10

Art.Nr.: 60247 / manufacturer: Nash

from 80,49 EUR / Stk.

incl. 20% VAT plus Shipping

Delivery **Thu 05. Nov - Fri 06. Nov 2026**

2 Stk. in stock

Product information

Length in feet (ft):	13 ft
Test curve (lb):	4.00 lb and more

The Air Force F10 rods form the foundation of the Air Force rod series and offer an ideal entry point into a performance-oriented range trusted by carp anglers across Europe. Positioned below the F20 and F40 series, the F10 was developed to deliver the true Air Force casting DNA in a more accessible design without compromising on essential features.

At the heart of the F10 is a high-quality, low-resin carbon blank designed for a light and fast-recovery action with direct feedback. This sophisticated construction provides the necessary power reserves for long casts and frequent casting, while simultaneously enabling excellent control and feedback during the fight.

Each rod features a matte, low-glare finish, high-gloss black wraps, and subtle Air Force branding. This creates a modern and understated look. A precisely positioned Fuji reel seat with gunsmoke metal caps enhances casting efficiency, complemented by a discreet Nash line clip just in front of the reel seat for practical and consistent line management.

Seaguide TDG double-leg guides with Adaman coating ensure low-friction line guidance, high durability, and corrosion resistance. Well-thought-out guide spacing supports balanced load distribution and improves casting control. The package is rounded out by a Japanese heat-shrink handle and ergonomic details at the handle end, ensuring that the Air Force F10 rods perform smoothly, cast efficiently, and deliver impressive results even during intensive use.

Features:

- Entry-level model within the Air Force rod series without compromising on performance
- Low-resin carbon blank for fast recovery and controlled power transfer
- Smooth and responsive action for long-distance casting and sustained use
- Matte premium finish with a modern, minimalist design
- Optimized guide spacing, developed based on insights from competitive casting
- High-quality components for durability and long-term reliability
- Low-resin carbon construction
- Seaguide TDG double-leg guides with Adaman coating
- Anti-Frap tip ring
- Fuji reel seats with gunsmoke metal caps
- Integrated Nash line clip
- Japanese heat-shrink handle with flared end
- Matte blank with low glare and high-gloss black windings

Features:

- 50mm star ring on 12ft and 13ft models
- 40mm start ring on the 10ft model

Product information

- 16mm tip ring on 12ft and 13ft models
- 12mm tip ring on the 10ft model
