Delivery **Thu 05. Nov - Fri 06. Nov 2026**

More than 10 Stk. in stock

RidgeMonkey Connexion Crimps are precision-engineered crimp sleeves designed to create clean and extremely secure loops for hooklinks and booms. They are particularly well-suited for stiff leader materials or in situations where traditional knots reach their limits. When used with the RidgeMonkey Nite Glo Crimp Tool pliers, they create permanently secure

Product information

connections.

Simply slide the crimps over the line, push them back, and then firmly crimp them with the pliers to create a clean and reliable loop connection.

Features:

- For creating strong loop connections
- Ideal for stiff leader materials
- Alternative to traditional knots
- Precise construction for a secure hold
- Suitable for rig and boom construction
- Compatible with the RidgeMonkey Crimp Tool
- Recyclable refill packaging
