4,99 EUR / Stk.

incl. 20% VAT plus Shipping

 Delivery **Mon 19. Oct - Tue 20. Oct 2026**

8 Stk. in stock

Add that extra touch of delicately spicy appeal to your bait.

Our 500g turmeric powder is a highly concentrated, all-natural feed additive specially developed for making boilies and groundbait. With its deep orange-yellow color, unmistakable, slightly tart aroma, and tremendous biological potency, turmeric is an absolute insider's tip for discerning carp anglers and bait makers.

Benefits & Effects in Boilies:

Turmeric gives your mix an extremely intense, natural orange-yellow color. Yellow has been proven to be one of the most easily detectable colors for carp and creates a strong visual stimulus underwater.

Excellent attractiveness in groundbait:

When added to groundbait or stick mix, turmeric disperses exceptionally well. It forms an attractive yellow cloud on the bottom of the water and releases a spicy scent trail that quickly lures fish to the spot.

Product information

Aids Digestion & Stimulates Appetite:

The curcumin it contains stimulates the fish's appetite and boosts its metabolism. The fish can process the bait more quickly, which significantly extends feeding periods at the spot.

Natural Antioxidant:

It protects the fats and proteins in your homemade boilies from premature spoilage and keeps your bait creations fresh longer.

Dosage & Usage Instructions:

Maximum dosage: Up to 5% (maximum 50 g per kilogram of dry mix).

Recommendation for year-round mixes:

Just 10 to 30 g per kilogram is sufficient to achieve excellent visual and flavor qualities. Preparation: Simply mix into the dry mix ingredients (such as fish meal, milk proteins, or grain flours) before adding the liquid ingredients.

Intended Use:

Exclusively for the production of fishing bait (feed material). Not intended for human consumption.

Consistency:

Finely ground powder with high solubility of the flavorings.
