With the Allroundmarin 165N Automatic Life Jacket in olive green, you'll be perfectly equipped for your activities on the water. This inflatable life jacket was specially designed for adults weighing 40 kg or more and combines reliable safety features with exceptional comfort.

The UML MK 5 activation system ensures the life jacket inflates automatically when submerged and also allows for manual activation. With a buoyancy of 165N, the life jacket offers a high-performance buoyancy solution for recreational boaters, anglers, and water sports enthusiasts.

The integrated lifebelt allows it to be secured to suitable attachment points on board. A crotch strap prevents the vest from slipping, while the adjustable back strap allows for a custom fit. The Allroundmarin 165N is ideal for boating, fishing, water sports, and use on board. Thanks to its adjustable fit, it can be adapted to different body sizes and shapes.

Features:
