Replacement Pressurized Gas Cylinder for 150 N and 165 N Life Jackets

The 33g pressurized gas cylinder is a compatible replacement part for select automatic life jackets with 150N or 165N buoyancy. It is used to replace a depleted or worn-out pressurized gas cylinder, thereby ensuring the life jacket can continue to be used properly.

The pressurized gas cylinder is specifically designed for adult life jackets and is ideal as a replacement or additional part for the corresponding equipment.

Features:

- Contents: 33 g compressed gas
- Suitable for: Life jackets with 150N / 165N buoyancy

Important

Product information

: Please check before purchasing whether the 33 g compressed gas cylinder is compatible with your life jacket model and the deployment system used. The compressed gas cylinder should only be used and replaced in accordance with the manufacturer’s instructions.
