from 129,99 EUR / Stk.

incl. 20% VAT plus Shipping

 Delivery **Mon 19. Oct - Tue 20. Oct 2026**

6 Stk. in stock

The PB Products Gator Braid Reloaded in the new "Weed" color was developed for carp anglers who refuse to compromise on their main line. Whether it's long casts, great distances, or obstacle-filled fishing spots—this braided line combines high strength with direct control and reliable bite detection.

Product information

Thanks to its special 4-strand construction, the Gator Braid Reloaded is designed to move efficiently through weed. The low-stretch braided structure allows for direct bite transmission and enhances control during the fight. An abrasion-resistant coating makes the line a suitable choice for challenging conditions involving branches, rocks, and other obstacles.

The line sinks slowly and, according to the manufacturer, remains positioned in such a way that it has as little direct contact as possible with rough or obstacle-laden bottom structures. The natural “weed” color blends inconspicuously into the surroundings and is particularly well-suited for waters with weeds and vegetation.

With a length of 1,200 meters per spool, the Gator Braid Reloaded is ideally suited for setting up a reliable main line on large carp reels.

Features:

- New Color: Weed – natural, inconspicuous color scheme
- 4-strand construction for use in weed-heavy waters
- Low-stretch braided structure for immediate bite detection
- Abrasion-resistant coating for demanding fishing conditions
- Slow-sinking line for precise positioning in the water
- Suitable for long distances and obstacle-laden fishing spots
- Line length: 1,200 meters per spool
- Two breaking strength and diameter options

Ideal for:

- Long-distance carp fishing
 - Waters with weeds and vegetation
 - Fishing spots with branches, rocks, and other obstacles
 - Anglers who value immediate bite detection and good control
-
