More than 10 PCE in stock

WATERCRAFT "NATURAL BOOST LIQUIDS"

We have made it our mission. If we produce feed and attractants, then only of the highest quality. That's what we stand for. For uncompromising quality! Honest quality with the right substances simply brings more fish. Throughout the fishing year.

This commitment to absolute quality is also reflected in our liquid products. Each of our liquids/dips is completely adapted to the respective boilie. This means that the main ingredients of the boilie are in concentrated, liquid form in the liquid. This means you can boost every type of Watercraft boilie and pellet with the right liquid. Of course, it is also an excellent idea to make groundbait or batter with our liquids or to tune your self-made boilies with them. These "bait boosters" can also be used ideally as a "hookbait dip". Dip hookbait with rig directly in the bottle. As we use bottles with an opening of 32mm inner diameter, you have the option of dipping hookbaits up to a diameter of 30mm.

Areas of application: Dipping boilies, boosting pellets, producing doughs, boosters for stick mix, match fishing, own boilie production, hookbait dip etc.

- goods produced by hand (no bought-in mass-produced goods)
- gentle processing preserves all valuable substances
- natural ingredients that really give off feeding signals to the carp
- no bitter substances - special preservation through 3 natural substances that cover all temperature ranges
- continuous catching success due to best quality

- unique baits give you an advantage **content:** 250ml **Overview of varieties:** **"Caribbean Dream"**, the Pinacolada for our carp! As the name suggests, this is a sweet, creamy liquid/dip with a wonderfully exotic touch. The composition basically consists of sweet natural liquids such as CSL and condensed milk. Naturally, other high-quality milk proteins are used, which give this bait its creamy taste and make it look fantastic in the water. There is also a dash of coconut and pineapple. The use of butyric acid makes this bait booster perfect. This provides the perfect feeding signals for our target fish in the water.

"The Secret of the Sea", are you looking for a sophisticated attractant that greatly increases the attractiveness and catchability of your food? Your

Product information

search has definitely come to an end! "The Secret of the Sea" is an intense stinker with a high protein content. In tests, this intensive bait booster has also produced tremendous results. The liquid is very complex and contains highly effective attractants. The basic composition consists of high-quality fish proteins, chicken liver, crab, squid, liquid robin red and betaine, to name just a few of the high-quality ingredients. The attractor works perfectly in the water and impressively reveals its "secrets" to the carp. We also use a little Squid&Octopus flavor here, which is second to none in terms of quality. Dip your hookbaits and you will hold the difference in your hands! **"Fortuna HR17"**, at the beginning of 2016 we worked on an effective competition formula. With the idea firmly in mind that this food really makes a difference. The aim was to set it clearly apart from other products. For a long time, we worked with fermented substances in combination with pheromones. Until we found what we were looking for in the Far Eastern "koi scene". This liquid has a similar structure to "Galatea Mexicana". In addition, the finest "Bloodworm" liquid is used. This fantastic bait booster also contains betanine, squid extract and amino liver. **"Scopex Chicken Buttercream"**, a taste like a chicken fried in butter with a sweet creamy finish! This bait booster is certainly made from one of our most sophisticated blends. The basic structure is based on poultry protein and chicken liver amino, butyric acid, Scopex, CSL and high-quality milk proteins. Carp love this taste and immediately recognize that this is tasty food. This fantastic liquid works perfectly in the water and increases your catch yield enormously. **"Royal Corn CSL"** Like a piece of cake for the carp that tastes like sweet fermented corn.

Area of application: Perfect for waters where a lot of corn and particles are fished.

For example, predestined for Croatian and Hungarian waters and as an attractor for competition boilies.
