Delivery **Thu 05. Nov - Fri 06. Nov 2026**

5 PCE in stock

Barbless - without rehooks
A new model in the Korda hook series. A hook with a slightly inward curved shank, a long ultra sharp point and fully Teflon coated and WITHOUT barb.

Product information

The Kurv Shank B is the counterpart to the Kurv Shank - only without barbs. This is because there are some waters, especially in England, where barbs are prohibited. Like the Kurv Shank, the Kurv Shank B is also very sharp and reliable, which gives the angler the opportunity to fish the hook on various rigs.
The Kurv Shank B also has an inwardly bent eye, which makes a shrink tube superfluous.
The Kurv Shank B is an incredibly versatile hook. The rig variations that are suitable for this hook range from blowback rigs to KD rigs and traditional presentations with bottom baits. If barbs are prohibited on your water - then the Kurv Shank B is your hook.

The Kurv Shank B is used by: Kenny Dorsett, Ali Hamidi, Danny Fairbrass, Adam Penning, Simon Scott, Nick Helleur.
